

renderSubtreeIntoContainer:创建root节点 insertUpdateIntoFiber:创建更新队列 beginWork:创建组件实例vnode,挂载vnode

completeUnitOfWork: createInstance:创建真实节点 commitAllLifeCycles:生命周期处理

commitLifeCycles: 绑定props、state, 触发componentDidMount或componentDidUpdate

commitCallbacks:清空回调队列

commitAttachRef :

commitErrorHandling:componentDidCatch错误边界

commitAllHostEffects: 节点操作

commitWork:根据节点类型(component、普通node),做不同处理(更新nodeValue等)

commitPlacement:挂载节点 commitUpdate:根据props,更新节点 commitTextUpdate:更新nodeValue
